

# Shorebirds - Threatened Little Wonders

Join us for a free workshop on shorebird migration, identification and conservation in the Top End

BirdLife Australia is holding this workshop to introduce you to the special shorebirds of the Top End. Learn more about their 10,000 km trip to get here, the threats they face and how we can give them a helping hand.

**This whole-day workshop is open to everyone interested in shorebirds and their protection. The workshop includes:**

- A presentation by BirdLife Australia's Shorebirds 2020 project manager on the feats of shorebird migration and the amazing adaptations of our resident shorebirds.
- A course and quiz to get you started or refreshed on shorebird ID and counting.
- A field trip to convince you that shorebirds don't all look the same...
- A goodie bag with a starter kit to our nationwide monitoring program Shorebirds 2020.
- Refreshments and Lunch provided.

Greater Sand Plover, Eastern Curlew, Beach Stone curlew by D Ingwersen

Golo Maurer, BirdLife Australia,  
Shorebirds 2020 Project manager

E: [golo.maurer@birdlife.org.au](mailto:golo.maurer@birdlife.org.au)

P: 039347 0757 M: 0467 444 114

*Please RSVP by the 15<sup>th</sup> of March!*

## AND AS A SPECIAL TREAT...

Micha Jackson from the North Australian Indigenous Land and Sea Management Alliance (NAILSMA) will give a short presentation about I-Tracker, a monitoring tool being used by Indigenous rangers across north Australia to collect geo-referenced information about their management work. A new collaboration with BirdLife Australia will adapt this tool for shorebird monitoring.
